## FRISIANS

A Germanic people who for about 2000 years have dwelt on the shores of the North Sea, between the Scheldt and the Elbe, and northward to the Coast of Jutland.

From the time of DRUSUS to about the end of the 1st Century, they were subject to the Romans; and were subdued by Charlemagne after an almost 200 yr struggle with the Franks. In the 17th century Christianity was introduced

among them by WILFRED. Archbishop of YORK &  
by WILLIBROD. The religious center of their  
heathenism had been the island of HELIGOLAND.  
While in eastern Frisia the dynasty of  
CARLSEANA ruled from 1430 - 1744. The Frisians  
never politically formed one united people,  
but were governed by a number of small  
chieftains. Bands of Frisians settled in  
England in the 5th Century. They have  
been and still are a capable, seafaring  
race, always possessing a strong instinct  
for freedom.
